

RLSERVICES S.r.l.

Industrial Consulting & Technical Services

ROV/OTS SERVICE - PRESENTATION

We provide remote underwater inspections performed with **ROV** (Remotely Operate Vehicle) that reach until 300mt of depth, for research and in-depth operation. The sophisticated equipment is controlled from the barge by experienced and qualified operators (in accordance with current domestic laws and regulations).

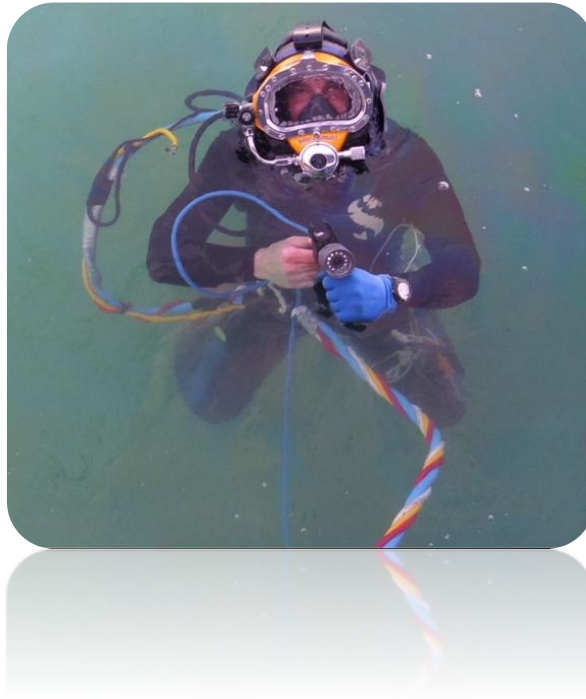

RLSERVICES S.r.l.

Industrial Consulting & Technical Services

Our Staff is also certified and authorised by competent authorities to operate both as a Scuba Diver and Underwater Inspector.

They have a full preparation, both practical and theoretical and they are perfectly equipped with instruments and special tools in order to perform the following underwater activities:

- NDE
- Ultrasound thickness checks
- Welding operation, repairs and maintenance
- Inspection, measurement and installation activities
- Research and rescue
